

7E-LED ELLIPTICAL

The TKO 7E-LED Elliptical is designed to deliver a smooth, comfortable, and user-friendly cardio experience in any commercial fitness space. A 21" stride length with optimized positioning is fine-tuned to support natural movement, helping users maintain proper form through every workout. The low 7" step-on height improves accessibility, making entry and exit easy for users of all fitness levels.

Oversized pedals with narrow spacing promote a stable, comfortable stride while minimizing lateral hip movement to help reduce lower-back stress. On-your-finger-tip resistance controls allow quick, effortless intensity adjustments during training. Thoughtful design details like a removable rear cover simplify servicing, while conveniently placed accessory storage keeps personal items secure and within reach throughout the workout.

Model	7E-LED
Certification	CE,ETL,EN957
